DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the limitation of selecting an individual time offset for each waveform of a plurality of waveform by determining which of a possible set of offsets is being used by a lowest number of waveforms; delaying each of the plurality of waveform in accordance with said individual time offset; combining said delayed plurality of waveforms for transmission from said transmitter to provide a minimum increase in the peak transmit power in one transmission time frame as disclosed by the flow chart must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New

Sheet" pursuant to 37 CFR 1:121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 9 and 10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The limitation cited "a possible set of offsets is being used by a lowest number of waveforms" fails to comply with the enablement requirement. The meaning of the term "a lowest number of waveform" is not clearly explained explicitly or implicitly.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 9, 10 are rejected under 35 U.S.C. 102(e) as being anticipated by Keashly et al. (U.S. Patent No. 6330289 B1).

Regarding claims 9, 10, Keashly et al. discloses the limitation of a method, an apparatus of limiting peak transmit power from a transmitter in a wireless communication system (Fig. 5, Abstract, lines 1 - 14), comprising: selecting an individual time offset for each waveform of a plurality of waveform by determining which of a possible set of offsets is being used by a lowest number of waveforms (Fig. 2, column 4, lines 17 - 31; Fig. 5, column 5, lines 45 - 67); delaying each of the plurality of waveform in accordance with said individual time offset (Fig. 2, column 4, lines 32 - 51; Fig. 5, column 5, lines 45 - 67); combining said delayed plurality of waveforms for transmission from said transmitter to provide a minimum increase in the peak transmit power in one transmission time frame (Fig. 3, column 4, lines 52 - 65).

Response to Arguments

6. Applicant's arguments with respect to claims 9, 10 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP

§ 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
